SUMMARY

Results-driven MCA student with strong problem-solving skills and hands-on experience in building web-based applications and modern databases. Skilled in developing scalable solutions, troubleshooting issues, and creating mockups or proof-of-concepts from high-level requirements. Adept at collaborating with cross-functional teams and communicating technical concepts clearly. Familiar with cloud platforms (AWS), with a strong commitment to delivering high-quality, client-focused solutions.

EDUCATION

Master of Computer Applications, PES University, Bengaluru	Expected 2026
CGPA - 7.88	

Bachelor of Computer Applications, KLE Society's College of BCA RLSI, Belagavi	2021 - 2024
CGPA - 9.1	

SKILLS

Languages	Python, Javascript, SQL
Frontend	React, React-Native, HTML/CSS
Backend	Node.js, REST APIs
Database	MySQL, MongoDB, Firebase
Cloud and Tools	AWS, Github

EXPERIENCE

Frontend Developer Intern | Techplement

- Built responsive web interfaces using HTML, CSS, and JavaScript following modern web development practices.
- Assisted in developing and enhancing frontend components to improve usability and responsiveness.
- Gained practical experience in frontend development, debugging, and collaborative software development.

PROJECTS

Fitledger (React native, Firebase, HuggingFace dataset, Expo)

Developed an android application for comprehensive calorie and macronutrient tracking, enabling users to log food intake, monitor nutritional goals, and visualize macro breakdowns in real-time. Leveraged React Native and Firebase for seamless data management and real-time synchronization. Integrated the HuggingFace Food Dataset to provide accurate nutritional data for over 1,000 food items. Implemented a user-friendly interface that improved data entry efficiency by 30% and enhanced user engagement through interactive visualizations.

Taekwondo Academy Management System (React, Node.js, Express, MongoDB)

Developed a full-stack web application for a martial arts training center featuring role-based authentication, enabling students to book trial classes, track attendance, and monitor belt progression in real-time. Leveraged React and Express to create a seamless user experience with an admin dashboard for managing students, trial requests, and contact messages. Integrated MongoDB for efficient data storage and implemented JWT-based authentication that enhanced security and user session management, designed to support over 100+ student enrollments through an intuitive interface with responsive design.
